

SAFETY FOOTWEAR DISCOUNT FOR MEMBERS

REDUCE RISK WITH A SHOES FOR CREWS SAFETY FOOTWEAR PROGRAM — AND SAVE **SHOES FOR CREWS CAN REDUCE SLIPS, FALLS BY 67%**

Slip and fall accident and injury are a major source of workers' compensation losses.

Shoes For Crews proprietary slip-resistant outsole technology sets the standard in safety footwear for the workplace. According to a recently published NIOSH study, a company paid program utilizing Shoes For Crews was proven to reduce slip and fall frequency by 67%*.

Enjoy the benefits of a company paid Shoes For Crews footwear program:

- **Corporate Discount Pricing - Up To 30% Off**
- **250+ Styles of Slip-Resistant & Safety Footwear**
- **Fast Free Exchanges and Easy Returns**
- **60 Day Wear & Compare Guarantee**

If an employee slips and falls while wearing Shoes For Crews, SFC will reimburse your company up to \$5,000 for each workers' comp claim. Conditions apply.

Each Corporate Program registered with SFC will receive an initial consultation with Lisa's Team, a personalized catalog of shoes that is tailored to their operations/exposures, as well as an individualized Corporate Program Web-page.

SFC® OUTSOLE COMPOUNDS

NOT ALL OUTSOLE COMPOUNDS ARE THE SAME—LEARN WHY

Shoes For Crews accomplishes its industry-leading slip resistance in two ways.

The first is through the outsole **tread pattern**, and the second is through its outsole **compound**.

SFC® COMPOUND

- An improvement on SFC's original slip-resistant compound, which was first developed in 1984 when SFC was founded
- Has improved performance in abrasion and durability
- Built for indoor, room-temperature environments where there are changing surfaces and occasional spills

4SG™ COMPOUND

- 4SG™ stands for "4-Season Grip"
- Built to retain grip on wet, dry and frosted ice, as well as wet, dry and oily/greasy floors
- Free of any sharp elements; won't scratch or damage floors
- Not intended for long exposure to petroleum products

4HD™ COMPOUND

- 4HD™ stands for "High Durability"
- Extreme resistance to abrasion and cutting; lugs will retain their shape longer, thus extending the life and performance of the shoe
- Enhanced durability against petroleum products such as oil and gas

Note: All SFC® footwear includes outsoles that have been "whole shoe" tested and all meet or exceed current ASTM slip resistance standards.
